LIFE AND LIGHT: THE IMPORTANCE OF BIOLUMINESCENCE IN LIFE, HEALTH AND ENVIRONMENT

During the International day of Light promoted by UNESCO, the International Society for Bioluminescence and Chemiluminescence (ISBC) welcomes the promotion of activities by its members around the word emphasizing the importance of bioluminescence and chemiluminescence for life sciences, health and environment. The *Museum of Science and Technology of Luminescence* of Federal University of São Carlos at Sorocaba city will perform expositions and demonstrations of Luminescence driven to life sciences, health and environment, with a special emphasis on Bioluminescence, the emission of visible light by living organisms. There will be expositions of Bioluminescent Beetles from the Atlantic rain forest and Amazon forest, as well as practical demonstrations of photoluminescence, chemiluminescence and bioluminescence, exhibiting products developed in our university. The academic community of Sorocaba and region is welcome to participate.

Vadim Viviani

President
